

LOOKING FOR TOMORROW'S BUSBAR?

We are
on the way.

ELECTRIFICATION
by MOBILIS®

ABSOLUTE POWER IN MOTION

Electrification by **MOBILIS** is a brand of the ESARIS Industries Group and supplies a complete range of mobile conductor bar systems (20 to 630A).

FOR CRANES, HOISTS, LIFTING AND HANDLING EQUIPMENT

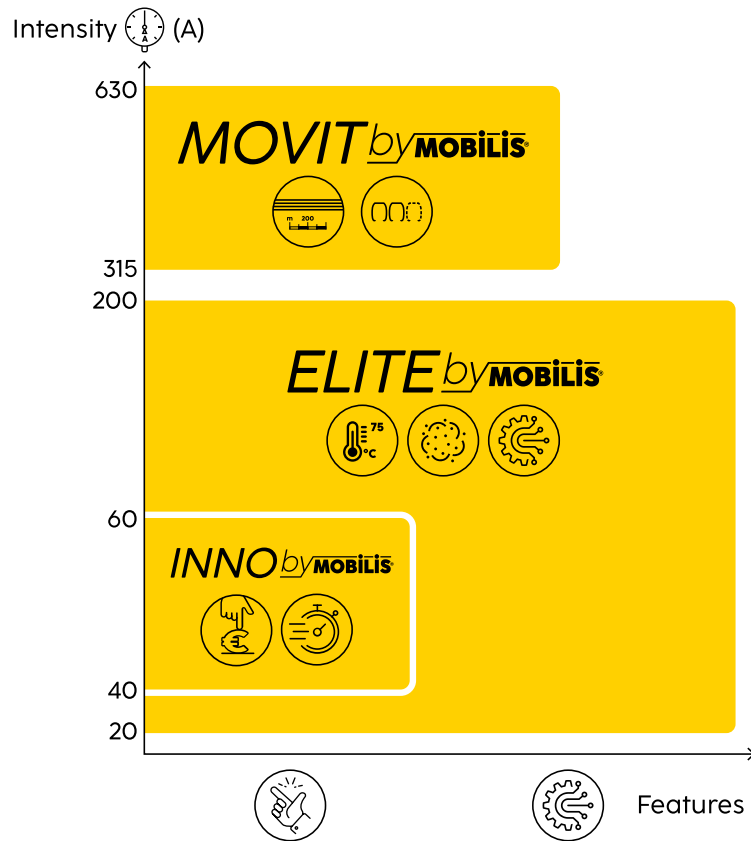

The ranges have been developed by our experienced engineers, specialists in your sector to provide the best solutions to your projects. Whether you are a **manufacturer or an end user**.

france
MADE IN FRANCE

Designed and manufactured in France, the electrical busbars INNO by MOBILIS, ELITE by MOBILIS and MOVIT by MOBILIS are **available throughout the world**.

UP TO 630A

UNLIMITED NUMBER OF POLES

AT A GLANCE

ELITE by MOBILIS

20...200 A | 4 or 5 poles

Challenging requirements?
Special environment (temperature, dust)?
ELITE by MOBILIS is the most versatile product of the range.

UL UK CA CE

INNO by MOBILIS

40 or 60 A | 4 poles

The solution for straight lines
and tight space

UK CA CE

MOVIT by MOBILIS

315...630 A | X poles

High intensity delivered by
monoconductor rails for extra long lines

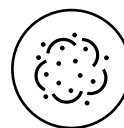

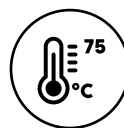

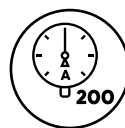

UK CA CE

ELITE *by* MOBILIS®

Challenging requirements?
Special environment (temperature, dust)?
ELITE by MOBILIS is the most versatile
product of the range.

Curves, loops, transfers ... are possible with
its numerous options. Multiconductors 4 or
5 poles busbars are also available in high
temperature or with rubber gaskets for
dusty environments.

Modular systems

- Tailor made curved systems
- High temperature version (+75°C)
- Protection lips for dusty environment
- And: ventilation element, interruption element, introduction gate, transfert elements, maintenance tools

The solution for the most various applications from 20 to 200A.

Easy to set up - select 9 components to get a complete electrified line.

Curves, loops, transfers ... are possible with its numerous options.

Easy and secure connection - self-breaking screws for optimum connection. You can take down a busbar system ELITE by MOBILIS at any time.

Quick and easy assembly - just clip the bars into the self aligning sliding hangers.

The busbars are for use indoors as well as outdoors.

ELITE by MOBILIS - maximum versatility and modularity

Conductor bar systems ELITE by MOBILIS are mainly used to deliver power to:

- Cranes
- Jibs and hoists
- Automated storage
- Tasksaver systems
- Theatre stages
- Wastewater treatment or composting plants
- Or many other applications inside or outside

Safety, reliability, durability

The specific profile of the rail provides stability to the line and is IP23 rated so it is finger safe and resistant to rain.

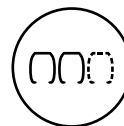

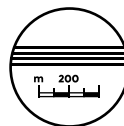

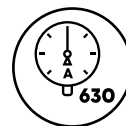

Upkeep requirements are minimized providing lower installation and lifetime maintenance costs.

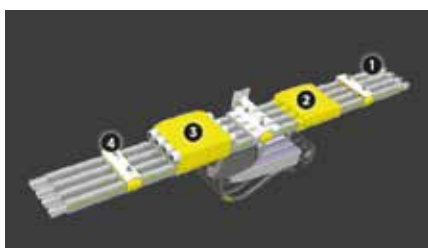

2024 - the ELITE by MOBILIS range has been awarded UL certification.

MOVIT *by* MOBILIS®

High intensity delivered by monoconductor rails for extra long lines? MOVIT by MOBILIS is the most suitable solution for this type of project, from 315A to 630A.

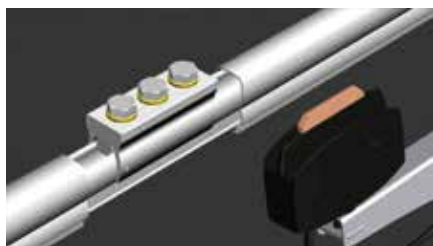

Suitable for long workshops - build lines up to 250 m without an expansion joint.

Easy to set up - 9 components are all you need.

The monoconductor system to use for high amperages with as many poles as needed.

The stainless tracks and aluminium conductors ensure a better conductivity.

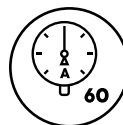

Quick and easy assembly - Just clip the bars into the self-aligning sliding hangers.

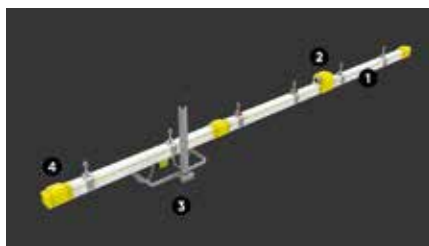

Safety, reliability, durability

Straight line, 4 poles, 40A or 60A and tight space?
This multiconductor system is the economical and technical solution, rapidly available. INNO by MOBILIS is THE solution for straight lines.

Meets economical and technical requirements of manufacturers, installers or end users.

Easy to set up - 10 components are all you need.

Quick delivered, at the best price.

Easy to set, even in tight spaces. No tools are required for the reusable connections.

Safety - the rigid closed profile is rated IP23 so it is finger safe and resistant to rain.

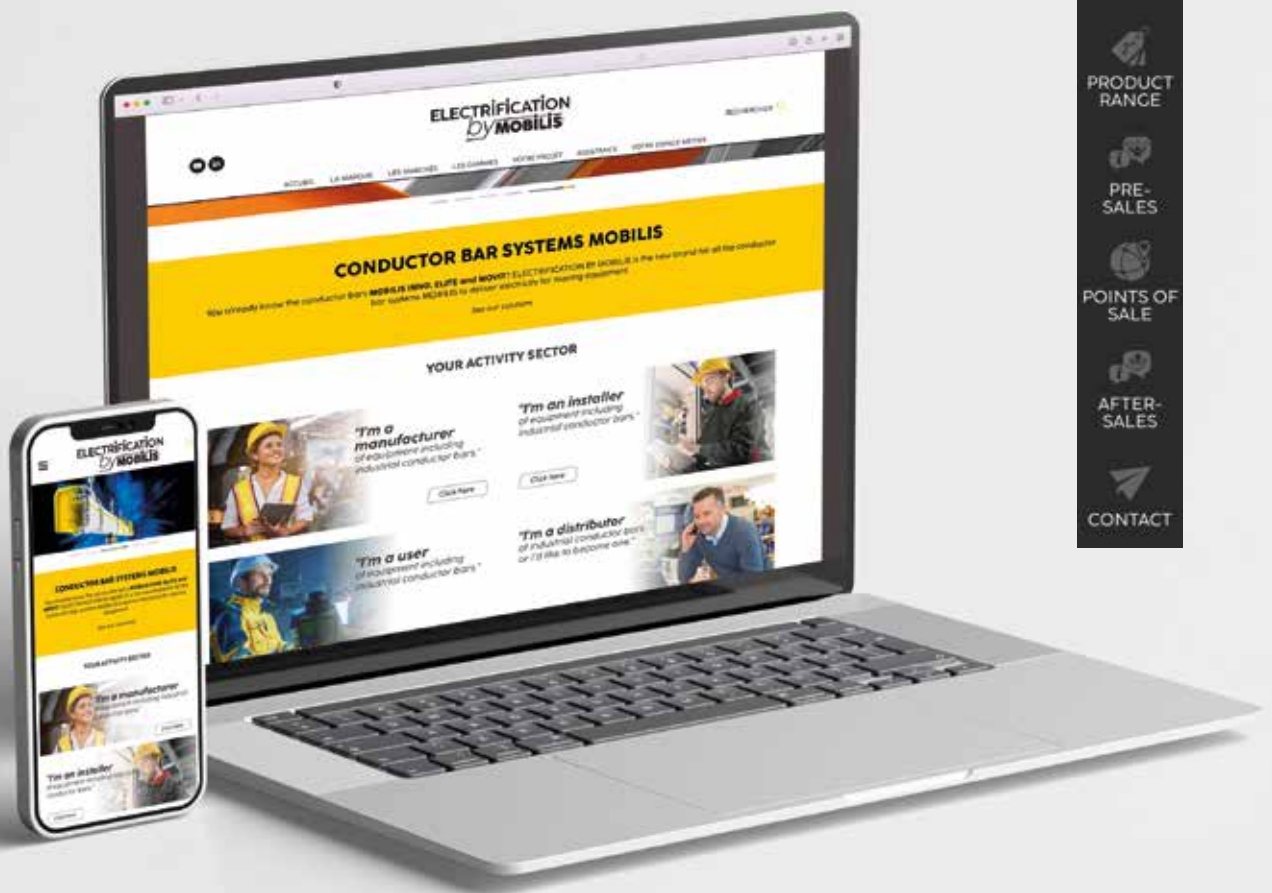

Trolleys durability exceeds the standard requirements,

QUOTE REQUEST
ONLINE

Need to build or renovate a line? In six steps you will put together a quotation request and send it to the distributor of your choice.

According to the information you provide, we recommend the range(s) that best fit to your requirements.

From a list of essential components for your configuration, you then select the items that make sense.

Your request...

Direct supply for **ELITE** by **WORLD**

Components	Model	Quantity
 410 - Saw blade (cut 20" - standard version)	000000	1
 411 - Saw blade (cutting 20" x 11" - standard)	000001	1
 500 - Chain saw (powered) 20" x 11" x 4"	000002	2
 500 - Chain saw (powered) 20" x 11" x 4"	000003	2

Monthly [Go back to step 1](#)

You will be contacted directly by the recipients of your quote request.

For this purpose, please fill in your contact details :

Company *	Service
First Name *	Address Line 1 *
Last Name *	Zip/Postal Code *
Email *	City *
Telephone/mobile *	Country *

The final step is to review the RFQ, fill in your contact details and send the request.

SUPPORT CENTRE

Online you will find all the tools and support services available to help you at every stage of your project, right through to operation.

PRE-SALES SUPPORT

Do you have technical questions about integrating an electrification line into your project? Access all useful information online (CAD, technical guides) and get answers from our experts.

INTENSITY CALCULATION

You don't know the intensity, an essential element of the project? Use this tool to determine the minimum value of the current to be delivered by the mobile electrification line.

COMPREHENSIVE CONFIGURATOR

Need a line with many features? The comprehensive configurator allows you to create any Electrification by MOBILIS line project.
